Subject: Flash report from a call with Euro Lithium - Valjevo - Li-Borate project status

On 2 May DG GROW held a telephone call with the representative of Euro Lithium ([REDACTED]) to clarify the information received on 29 April from Euro Lithium on stopping the planned geological exploration activity recently re-started in Valjevo region due to the strong anti-mining opposition encountered directly in the Valjevo field.

Main points:

- Euro Lithium will not continue the planned geological exploration (drilling campaign) for the next cc. 6 months, instead it will focus on education campaign in the local area of Valjevo.
- Euro Lithium will wait the steps of new Serbian government towards mining and Lithium mining in particular.
- The legal dispute against the Valjevo project filed at the end of 2021 was suspended by the highest court.
