**Subject:** Follow-up: joint [REDACTED] letter on Green Hydrogen / Delegated Act RED II  
**Importance:** High

Dear Mr Seibert, Mr Samsom, Mr Grassi and Mr Moutarlier,

The delegated act on the rules for producing green hydrogen from electricity remains a major concern for our companies.

Following our letter of 17 [REDACTED] from the hydrogen sector to Commission President von der Leyen on 9<sup>th</sup> September 2021 and Commissioner Simson's response on 29<sup>th</sup> October 2021, we would like to continue the exchange of views with you directly.

Attached you will find a **letter** with concrete suggestions for a workable compromise. The letter is carried by the [REDACTED] representatives of the **22 undersigning companies**.

We are happy to exchange further views on this topic in a virtual discussion at your best convenience.

Kind regards,

On behalf of all colleagues in copy

**Betreff:** letter to the Commission President Ursula von der Leyen

Dear Mr Seibert, Mr Samsom, Mr Grassi and Mr Moutarlier,

Please find attached a letter addressed to Commission President Ursula von der Leyen by [REDACTED] 17 major European companies active in the field of hydrogen and renewable energy. The letter will also be sent by post.

The [REDACTED] want to be a driving force behind the success of the European climate agenda and are personally committed to ensuring that the ramp-up of the hydrogen economy succeeds. Therefore, they wish to draw the President's attention to one very important issue that will largely determine whether major investments in renewable hydrogen will happen over the next few years: the design of the Delegated Act of the Renewable Energy Directive that defines the criteria under which hydrogen that draws electricity from the grid for its production can be considered renewable. The draft Delegated Act is currently being finalised under the auspices of DG ENER and, according to our information, should be published soon for public consultation.

We very much hope that our input will find your consideration. Please do not hesitate to contact us, the company representatives in copy, for any further information about this initiative.

Yours sincerely,

[REDACTED] Siemens Energy
