Dear [Name],

It was great meeting you today, and we’re looking forward to a potential collaboration between Amazon and Code Week.

Following our meeting, here are the main points that we brought up regarding what we can do in France for children or teachers/educators:

As a reminder, all our activities are free.

We can:

- Register Amazon [Name] activities on the Code Week map (we’d need more info about what it would imply):
  - [Name]
  - [Name]
- Provide 2 challenges to be posted on your website:
  - [Name]
  - [Name]
- Organize virtual and face to face presentations for Amazon employees to present their jobs.
- Provide teacher learning resources for them to be able to teach coding classes with our free online contents:
  - [Name]
  - [Name]
- Organize robotics workshops in primary schools if we received requests enough in advance.

If this is all good with you, as a next step, it would be great for you to connect with the [Name] team in charge of Amazon [Name] to decide on the timeline of these activities. Also we are very open to working with you outside of the usual October Code Week time if you would like to set something up in the coming weeks/months.

We’ll also be sending some docs about [Name] impact measurement once we’ve cleared that we can share it.
Looking forward to hearing from you,
Kind regards
