Dear Elisabeth,

Thanks for this update! Very useful. We will send you an updated non-paper from us with a view of a long-term strategy cob today. I hope you will find this paper useful to answer to p.22 in the December EuCo conclusions.

As you indicate, better to talk later this week? After informal Competetiveness + you have received our new paper.

Can we find time 8/2?

All the best,

...
On the broader concept of competitiveness and the different ‘ingredients’, colleagues in DG GROW have worked out several areas that they will present in the COMPET Council this week. We look forward to the discussions and reactions.

We expect to internally to see later this week what shape and form of the “Single Market at 30” communication should take, in terms of any new elements. So far no substantial new elements since we spoke in person.

I am available if you wish to speak at 15 h today, but perhaps we would have more substance a few days down the line.

With best regards,
Elisabeth

Subject: Follow-up

Dear Elisabeth,

Thanks to you and your team for good discussions on Friday!

Please find enclosed, as promised, an outline of an “competitiveness compass” — report written by Ecipe in Brussels (on the initiative of the Confederation of Swedish Enterprise) and key messages from ERT on European Industrial competitiveness.

Let's keep in contact moving forward on the long-term competitiveness strategy – it would be extremely valuable if we could get in contact directly after EuCO next week to discuss further!

All the best,
