Cargill – and is on our platform and they were also at the FEDIOL events and on several panels where I spoke

Dear

Nice to see you at the deforestation stakeholder meeting a couple of weeks ago.

In this occasion, I wanted to take the opportunity to share with you Cargill’s global Environmental, Social, and Governance (ESG) report, summarizing our ESG programs and performance across our company for fiscal year 2022 and our commitment to long-term sustainable value creation in Europe and across the globe, contributing to the transformation of food & agriculture system to help address many of our world’s most pressing needs – from climate action to supply chain continuity and food security.

While sustainability has long been a business priority at Cargill, in order to better share our strategy and actions we have produced our first-ever comprehensive ESG report. This report details the progress we have made to date in our operations, and across our supply chains, toward achieving our goals for reducing GHG emissions, supporting farmer livelihoods, advancing human rights, and amplifying our company’s broader global impact and provides proof points of our actions to deliver on commitments as part of the EU Code of Conduct on Responsible Food Business and Marketing Practices.

Sustainability is central to Cargill’s business strategy, the value proposition we deliver to our customers, and the shared value we create for society and the environment through our products, services, and programs.

The report aligns with our most material ESG topics and our sustainability strategy, focusing on the areas of Climate, Land & Water, and People, and highlights the
environmental and social outcomes we are driving across our operations, supply chains, and the communities where we live and work.

2022 Highlights

More than $70 million invested in energy efficiency and GHG emissions reductions in our operations

More than 1.4 million farmer trainings delivered in 2022

More than 5 billion liters of water restored

Advanced regenerative agriculture practices on 158,000 acres of North American farmland since 2020

More than 14 million people positively impacted by Hatching Hope since inception in 2016

55% progress towards our Scope 1 and 2 goal

Distributed more than $163 million to our partners and local communities

Increased representation on our executive team to 46% women

You may find the full report here.

I’d welcome a follow-up discussion with you and your team should you have any questions.

Best wishes,

Cargill
