Meeting with ARCELORMITTAL and EUROFER

26/03/2021

MINUTES

Minutes of the meeting:

Eurofer and Arcelor Mittal argued that there is a problem with using the Emission Trading Scheme (ETS) benchmark as taxonomy technical screening criteria for the steel sector, in reference to waste gases exports. According to them, the Steel ETS benchmark is based on an artificial calculation, exclusively for the sake of defining the allocation, that does not reflect the reality of the total CO2 emissions associated to the site and its actual performance.

Topics: Taxonomy, draft Delegated Act

TRN:

ARCELORMITTAL: TR: 23527541824-60
EUROFER: TR: 93038071152-83

Invitation: Ares(2021)1796997

Participants:

ARCELORMITTAL:
Art.4(1)(b)

EUROFER:
Art.4(1)(b)

EC:
BELTRAMELLO Andrea (CAB-DOMBROVSKIS), POWER Katherine (CAB-MCGUINESS), COLOMBANI Antoine (CAB-TIMMERMANS)
