    Subject: FW: Meeting Request with European Liquid Gas Sector

Dear Mr. Atunes,

I am contacting you on behalf of Liquid Gas Europe, the European association representing producers, distributors, and manufacturers of off-grid liquid gases such as LPG, renewable LPG and DME. We would like to request a meeting together with Liquid Gas Europe of Liquid Gas Europe, Polish Liquid Gas Association (POGP). We would very much like to discuss with you several developments within the “Fit for 55” package which will impact our sector.

Our members are active in: The buildings sector, by providing fuel for heating and cooking; the transport by offering alternative fuel for passenger cars; and in industrial applications. With the negotiations on the “Fit for 55 Package” ending, we would like to discuss with you the impact of the Energy Performance of Buildings Directive (EPBD), the revision of Ecodesign requirements for space heaters, and the negotiations on the definition of CO2-Neutral fuels on off-grid communities on our sector. We would particularly like to give you some insights into how these files might affect rural communities in Poland and France, as well as the rest of the EU.

The Liquid Gas sector is firmly committed to achieving net-zero emissions by 2050, by substituting fossil LPG with renewable liquid gases, such as renewable LPG as well as renewable and decarbonized Dimethylether (DME). These fuels can be instrumental in an affordable decarbonization of off-grid rural communities, which not always have the means or technical capabilities to electrify heating, cooking and transport at the same time. We would be delighted to discuss with you how the development of these renewable liquid gases are impacted by EU legislation.

We would very much appreciate a positive response to this meeting request. We are flexible regarding the timing, with preference for the meeting to take place around the week of the 23rd of October due to the time sensitivity of the files mentioned above. We would prefer an in-person meeting but would also welcome an online meeting.
Kind regards,
Art.4.1(b) - privacy
