Dear commissioner,

The agricultural market is in a very difficult situation and harvest forecasts are very pessimistic, especially for cereals, due to climatic phenomena and the war in Ukraine. Furthermore, even if the forecast for oilseeds and protein crops is stable in volume, the quality of these products could also be impacted, which would reduce their profitability. Here you will find attached a letter co-signed by 42 Members of the European Parliament asking you to kindly consider the prolongation of the derogation on GAEC 8.

Thank you very much in advance for your attention to this request.

Yours sincerely,
