Dear [name],

Thank you for these proposals.

The Commissioner is available on 8 March at 16.30. Would that be suitable?

Thank you

Kind regards,

---

Dear [name],

Thank you for your e-mail and please accept my apologies that it took us a few days to reply. We wanted to make sure the time difference between the US and the EU were taken into account for everyone’s schedules.

We are delighted that Commissioner Vălean is making herself available for a virtual meeting and would like to offer the following time slots:
- 2nd of March
- 3rd of March
- 5th of March

If none of these possible, we can offer the 8th March as back-up.

All times European afternoon after 14h00 (2pm) please (in order to accommodate the 7 hours difference). I look forward to engaging in a meaningful dialogue to help move the overall clean energy transition in a powerful way.

Kind regards,

Dear [Redacted],

Allow me to send a kind reminder about the call with Commissioner Vălean.

We would appreciate if you could share with us some time slots during the first two weeks of March.

Thank you,

Kind regards,

From: [Redacted] (CAB-VLEAN)

Subject: RE: MEETING REQUEST (videoconference) from waste-based biodiesel leaders to discuss sustainable aviation fuels (SAF) Proposal

Dear [Redacted],

Commissioner Vălean would like to thank all signatories for the meeting request and she would welcome a virtual conversion with you.

Would you be so kind and send me your availabilities/timeslots for the last week of February and the first two weeks of March?

Thank you very much

Kind regards,
Dear Commissioner Valean,

The undersigned, [Company Name], are writing to request a meeting via videoconference with you to discuss the Commission’s plans to promote sustainable aviation fuels (SAF) in the upcoming March 2021 ReFuelEU legislative proposal.

The Commission intends to propose a compulsory blending mandate that relies heavily on waste lipid feedstocks listed Annex IX of the Renewable Energy Directive (REDII), especially those in part B, used cooking oil and animal fats.

There are several ways to achieve the Commission’s and our goals of maximizing the total reduction of GHGs in the most efficient manner possible. As an example, we can look at how Germany and the UK have already
created solutions to increase renewable feedstock going into aviation. These countries are supporting novel pathways and feedstocks and encourage the development of medium to long term technologies like e-fuels or cellulosic-to-aviation to successfully decarbonize aviation.

We will make ourselves available for a videocall whenever it suits you best.
