Subject: Request for Meeting to Discuss Simplified MRV Proposal with Phased Implementation

Dear [redacted],

We hope this message finds you well.

On behalf of ASD (Aerospace and Defence Industries Association of Europe) and A4E (Airlines for Europe), We are writing to share with you our joint proposal for a simplified non-CO2 Monitoring, Reporting, and Verification (MRV) system, with a phased implementation approach.

The attached document outlines our proposal in detail, highlighting the rationale behind the suggested changes and the benefits they will bring.

Our key recommendations include:

- A phased implementation starting in 2025, with operators initially reporting only essential data and gradually increasing the granularity of reporting as the system is validated and proven useful.
- Utilization of automated data sources such as ADS-B/Eurocontrol for flight trajectories to minimize the burden on operators.
- Establishment of a single source of truth for weather data, managed by an independent body, to ensure fairness and accuracy in emissions computations.
- Inclusion of incentives for reporting sensed humidity data and fuel properties from suppliers, consistent with existing CO2 MRV practices.

We believe this streamlined approach will significantly reduce administrative burdens while maintaining robust data governance and accuracy. It will also allow for continuous improvements based on real-world data and research findings.

Given the urgency of this matter, we would like to request a meeting with you at your earliest convenience to discuss our proposal in more detail.

Please let us know a suitable time for you, and we will make the necessary arrangements.
Thank you for your time and consideration. We look forward to the opportunity to discuss this proposal with you.

With kind regards,

[Redacted]
