

EUROPEAN COMMISSION
HEALTH AND CONSUMERS DIRECTORATE-GENERAL

Deputy Director General for the Food Chain

Brussels,
SANCO/E6/AS/gm D (2013)

Dear Ms. Geslain-Lanéelle,

Subject: Literature review of the "Réseau Environnement Santé" on Bisphenol A

On 21 January the "Réseau Environnement Santé" has informed us on the compilation on studies on Bisphenol A (BPA) which resulted from their monitoring of literature. The compilation comprises studies published between January and September 2012 concerning exposure to BPA and health impacts linked to BPA (see attached).

EFSA is currently on its own initiative re-evaluating Bisphenol A taking account of the new scientific information which became available since 2010. The publication of the opinion is planned for May 2013.

I am aware that EFSA has performed a thorough literature research. However, I would like you to cross-check with this compilation to ensure that the re-evaluation is taking into consideration all relevant studies.

My services remain at your disposal for further information. On this matter you can contact [REDACTED] who is responsible for this dossier in Unit E6 Sustainability and Innovation and [REDACTED] who is the relevant contact point in the Unit 03 in charge of science and stakeholder relations. Their respective phones and email addresses are indicated below.

Yours sincerely,

Ladislav Miko
