Subject: EU consumers have little appetite for cloning - BEUC position paper on animal cloning for food

Dear Ms [REDACTED],

We are pleased to share with you the BEUC position paper on animal cloning for food production published today.

Most EU consumers disapprove of the use of cloning for food production. We believe this should be recognised and respected, meaning that EU consumers should be able to make an informed choice when it comes to purchasing and consuming food from cloned animals' offspring and descendants. As the minimum, we wish to see the reintroduction of the package of measures on which the Council and European Parliament could have agreed back in 2011.

We hope the attached position paper can be of interest. Please do not hesitate to contact us, should you have any question.

Kind regards,

[REDACTED]
