Subject: RE: Legislative proposal on cloning

Dear ,

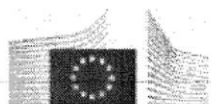

Many thanks for your mail. I confirm you that we are working on a legislative proposal on the cloning technique for food production based on a detailed Impact Assessment which is on-going. Based on the outcome of the Impact Assessment procedure, the scope of the proposal (cloning technique, live animals, reproductive materials and food) will be defined.

The Commission intends to adopt the legislative proposal by the end of the year.

Hope this answers your questions,

Best regards

Dear [REDACTED] and [REDACTED]

Hoping you are doing well.

I would be grateful if you could kindly inform us on the state of play of the EC legislative proposal on cloning, future steps and potential timing for presenting such a proposal to the Council and the Parliament.

Besides that, it would be very useful if you could share the main general approach that the proposal will cover. Would it be aligned with the proposal already presented in 2010 by the Commission? If there will be some changes, could you please provide us some information and details?

I've got some info that the legislative proposal would be presented by the Commission in November.

How do you foresee discussions within the Parliament taking into account the parliamentary elections scheduled in May 2014? Would this further delay the definition on the matter?

Thank you for the information you could share on this.

Best regards,

[REDACTED]
