Meeting with Danish Energy Association – 3rd of December

Representatives of the Danish Energy Association (DEA) presented their points of view on the reform of the electricity market as well as on the review of EU emission trading. DEA also presented information on the evolution of energy prices in Denmark and raised the importance of flexible price-setting as well as of interconnections with Germany. P.Schellekens informed DEA about the Commission's current thinking on the up-coming legislative initiative on electricity market design as well as the review of the renewable energy directive and the energy efficiency directive. The meeting also discussed prospects for a successful deal at the on-going climate conference in Paris
