**Subject:** BTO report of meeting on 11/09/2012 of ISSG on cloning

### **BTO report of meeting on 11/09/2012 of ISSG on cloning**

Present: ENT: [REDACTED], AGRI: [REDACTED], RTD [REDACTED], TRADE [REDACTED], JRC: [REDACTED]  
SANCO: [REDACTED]  
[REDACTED]

### **General comments:**

- Feasibility assessment for the various approaches: **no criteria** for feasibility and assessment makes **no differentiation between the various steps for same approach**: assessment made is **not relevant**.
- [REDACTED]
- **Lack of consistency of figures / stats on the same issue** between various parts of the text.
- **Assessment of DNA traceability** does not take into account all the parameters and interest is **overestimated** and misleading (section 8.3.2.).
- PDF and Word versions: sections and tables references are different.

### **Detailed comments:**

#### **Chapter 2**

- **Interest of cloning technique** (Section 2.1): [REDACTED]

- **Baseline / economics** (Section 2.3): [REDACTED]

[Redacted]

## Chapter 4

- **Statistics on trade** (section 4.3)

[Redacted]

## Chapter 5

- **Methodology** (section 5):

[Redacted]

- 
- 
- 

[Redacted]

## Chapters 7 (suspension approach)

- 

[Redacted]

## Chapters 8 and 9 (traceability approach and traca + labelling approaches)

- 
- 

[Redacted]

## Chapter 10 (Pre-market approval approach)

- 

[Redacted]
