**Cc:** [REDACTED] (CLIMA); Axel Eggert; Ghenda, J.  
**Subject:** Ecofys-EUROFER study on EU ETS post 2020

Dear [REDACTED],

I am contacting you as a follow-up of the recent meeting between Commissioner Canete and CEOs from steel industries that you and Ms Slingerberg also attended.

As it was mentioned on that occasion, Ecofys has recently published a study commissioned by EUROFER to assess more in details the impact of the Commission proposal on post 2020 EU ETS on the steel industry. The study was presented in a dinner debate at the European Parliament in November where your predecessor [REDACTED] was present as well.

As a follow-up of the discussion between Commissioner Canete and CEOs from steel industries, we would like to arrange a meeting with DG CLIMA's services to discuss more in details the findings and the methodology of the study. Considering the relevance of the subject, we would like to involve in the meeting also representatives from Ecofys and a small delegation from our membership.

Could you please inform us if you agree with this proposal and, if this is the case, could you please indicate few dates in the coming weeks when you would be available.

Kind regards,  
Adolfo Aiello
