Dear Sir,

Each year in November the *IFP Energies Nouvelles*, *IFP Training* and *Petrostrategies* organise in Paris an International Gas, Renewables and Electricity Summit which is now a must for our industry. This top-level conference brings together key decision-makers, officials from international organisations and heads of the largest companies as well as many journalists and executives of the oil industry.

The previous Gas and Electricity Summits were hailed as great successes by participants and press alike. The high quality of documents and speeches throughout was a key contributing factor to the Summits' great success.

It is our honour and privilege to invite you to be a Keynote Speaker in the 21<sup>th</sup> International Gas, Renewables and Electricity Summit, which will take place on November 9, 2016, in Paris. We are certain that your participation would make a valuable contribution to the success of this event and we would be particularly pleased if you could accept our invitation.

Sincerely yours.
