**Attachments:** Congresso europeo - english provvisorio.doc

Dear Mr Arias Canete,

The expiry date for the 20-20-20 Plan is close, but in most European Countries, civil construction still represent the main energy consumption source, contributing significantly to the environment pollution.

To stop and reverse this trend, the international “CondominioItalia Expo” fair , taking place in BolognaFiere from the 19<sup>th</sup> to the 22<sup>nd</sup> of October 2016 , is hosting the “first European congress on energy efficiency in view of the 20-20-20 European goal”. The fair is held with the patronage of the Ministry of Environment, of Enea, of the National Boards of the professionals working in the building sector and of all the Italian real estate and condominium associations.

The event – taking place Thursday the 20<sup>th</sup> and Friday the 21<sup>st</sup> of October – has a programme with a dense calendar including meetings, debates and practical demonstrations. The aim is to be the first in Europe to bring together all the main actors of the building sector: politicians, institutions, real estates, condominium administrators, designers, technicians, installers and real estate operators.

Each of them will have to set the situation into a National and Community perspective, to underline the critical points which still slow down the development of an effective and substantial increase of energy efficiency in buildings. During the congress the parties will highlight the resources – financial, technological and legislative – that are actually facilitating the process and will also make proposals to be include in a protocol of international agreement.

It is not going to be a mere dissertation, but a concrete action to spread around Europe, building models able to reduce the energy consumption and the emission of pollutants.

We strongly believe that Your participation to this event, as representative of the Institution, is essential and we hope in a positive response to enrich the Congress with your valuable contribution.

Attached you will find a provisional programme and if you wish further information please click on the link below (English version will soon be available):
