Subject: * INVITATION * 6th Stakeholder Joint Working Session (SJWS#6) on TYNDP 2017

Personal Invitation

Invitation to 6th Stakeholder Joint Working Session (SJWS#6) on TYNDP 2017

Dear Sir and Madam,

The European Network of Transmission System Operators for Gas (ENTSG) is pleased to invite you to its 6th Stakeholder Joint Working Session (SJWS#6) on TYNDP 2017 on **13 July 2016 in Brussels**, from 10:30 to 16:30.

In this session ENTSG will inform the stakeholders on the input data that will be used to develop TYNDP 2017, including on **demand data** and on **infrastructure projects** submitted to the TYNDP.

The venue for this event is : **Hotel Silken Berlaymont, Blvd Charlemagne 11/19, 1000 Brussels**

You can find more detailed information in the **Venue area**

Agenda for the event will soon be available in the **Agenda Area**.

We are looking forward to your participation to this event. To register for the event, please fill in the registration form in the **Registration area**.

The deadline for registration is 5 pm (CET) on 7 July 2016.

If you have any questions please contact Mirsada Spaho: mirsada.spaho@entsog.eu.

For more information visit our **TYNDP 2017 webpage** and have a look at the Stakeholder engagement process completed so far:

- 12th TYNDP Workshop - 11 May

- SJWS#5 - 10 March
- SJWS#4 - 23 February
- SJWS#3 - 9 February
- SJWS#2 - 26 January
- SJWS#1 - 13 January
- TYNDP 2017 kick-off Workshop - 12 January

Yours sincerely,

Personal Invitation

Invitation to the 12th TYNDP Workshop in Ljubljana on 11 May

Dear Sir and Madam,

The European Network of Transmission System Operators for Gas (ENTSOG) is pleased to invite you to participate at the 12th TYNDP Workshop on **11th May 2016** from 10:30 to 16:30 in **Ljubljana**.

In the 12th TYNDP Workshop, ENTSOG will present the **TYNDP 2017 concept and timeline**, which builds on the feedback from the five Stakeholder Joint Working Sessions that took place between January and March 2016.

Stakeholders are welcome to deliver a presentation. In this case, please contact Céline Heidrecheid: celine.heidrecheid@entsog.eu

The venue for this event is: **BEST WESTERN PREMIER Hotel Slon, Slovenska 34, Ljubljana, 1000, Slovenia**.

You can find more detailed information in the **Venue area**.

Agenda for the event will be available soon in the **Agenda Area**.

We are looking forward to your participation to this event. To register for the event, please fill in the registration form in the **Registration area**.

The deadline for registration is 5 pm (CET) on 3rd May 2016.

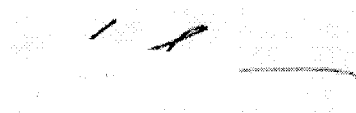

If you have any questions please contact Mirsada Spaho: mirsada.spaho@entsog.eu

For information on the TYNDP 2017 Stakeholder process completed so far, please see below:

Subject: On 23 January afternoon: Join us at the TYNDP 2017 Presentation!

Personal Invitation

On 23 January afternoon: Join us at the TYNDP 2017 Presentation!

On **23 January afternoon from 13.30 to 17.00**, ENTSOG will present **TYNDP 2017** to stakeholders at ENTSOG premises, Avenue Cortenbergh 100, 1000 Brussels.

Learn more about the TYNDP framework and results:

- Do you know that TYNDP is a **regulatory bi-annual exercise** under the Third Package, developed in close cooperation with relevant EU institutions and with continuous involvement of stakeholders?
- Do you know that ENTSOG organised more than **10 stakeholder events** over 2016 to ensure their involvement throughout the TYNDP development process? A large panel of stakeholders took part: NRAS, network users, NGOs, promoters, ENTSG-E, green gases associations...
- Do you know that **more than 20% of EU energy consumption** is supplied by gas? TYNDP role is to inform stakeholders, decision and policy-makers whether the gas infrastructure is fit to ensure secure, competitive and sustainable gas supply to all EU citizens.
- Do you have in mind what is the level of development of the gas infrastructure in **different parts of Europe**? TYNDP looks in details into each of the areas, to see if and where more infrastructure would be needed to ensure security of supply and support market development.
- Do you know that TYNDP looks **20 years ahead**? Assessing the gas infrastructure requires to frame the future uncertainties: ENTSOG developed **4 scenarios**. These scenarios are not forecasts and not one is considered more probable than the others. They set the **necessary frame** to consider the possible future evolutions – to ensure that the gas infrastructure is robust to all of these developments.
- Do you know that TYNDP scenarios provide detailed **country-level** information, that they are developed consistently with **ENTSG-E** TYNDP scenarios and that they are in line with European Commission and IEA EU-level scenarios?
- Do you know that gas represents a **low-carbon complement** to renewables, a **climate-friendly alternative** to coal, lignite and oil, and can be supplied from **renewable sources** – and that it is available in **most parts of Europe** via the existing infrastructure?

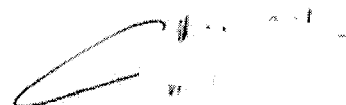

All of these topics and more will be covered in our TYNDP Presentation on 23 January.

Join us and interact with us, from 13.30 to 17.00 at ENTSOG premises (register here) or attend the webcast (register for the webcast).

Don't miss the opportunity to provide your feedback on TYNDP also through the **online public consultation**, which is open until *3 February 2017*.

We are looking forward to your participation.

Yours sincerely,

Dear

Sorry for not answering to you before.

It is not fully clear to me from the below email what you have in mind.

As part of the TYNDP project collection, we will collect a number of information that may be of interest for you when collecting PCI applicants:

- The full questionnaire promoters have to answer when submitting a project on ENTSOG Project Portal is detailed from page 18 of the enclosed document (also available [here](#))
- All project data (TYNDP Annex A) will be made public around summer, in xls format (you can refer to TYNDP 2015 Annex A to have an idea how it looks TYNDP2015 annex A Infrastructure Projects): EC will be able to make use of these data.

To further investigate this topic, please get in touch with , ..

Best Regards,

Subject: submitting application of projects for PCIs

Dear

With whom in ENTSOs could we speak about potentially using your respective TYNDP project data collecting on-line platforms for collecting applications from PCI candidates?

Most likely there are important information overlaps between both processes. We would like to see if it would be at all possible to exploit synergies and avoid asking promoters to repeat certain information.

We would like to organise a short meeting next week to sound out if there is a scope for cooperation.

Thank you in advance

Subject: TYNDP 2017 projects check: TYNDP project code for 2nd PCI list projects?
Attachments: 5_2 PCI annex.pdf

Follow Up Flag: Follow up
Flag Status: Flagged

Dear both,

As part of the checks we will have on projects submitted to TYNDP 2017, we will check if projects from the 2nd PCI list have effectively been re-submitted in TYNDP 2017.

To help us with this check, would you be able to provide us with a correspondence table between "PCI code" (eg. 6.9.2) and "TYNDP15 project code".

That would be very useful as for the time being, the only document we have is the enclosed one. I please ask you to copy my 2 enclosed colleagues in your answer.

Please also be informed that following [redacted] departure, our new colleague [redacted] will take over his activity related to project.

I am sure we will have the opportunity to introduce him to you soon.

Thanks in advance,

Hi

To be honest, we definitely do not have a clear view on the CBA update topic on our side.
Only thing I can say is before mid-November we will have almost no time to dedicate to the consultant, delivery of TYNDP17 being our n°1 priority. Sorry.
On further timeline, we would need to think more and re-discuss with you.
One of the things we need to sort is, looking at the process, would EC be ready to engage in an update process in 2017?

Subject: project grouping recommendation

Hi [REDACTED]

as discussed attached you find the "soft" recommendation to provide Regional Groups for project grouping. Is not the slide will be presented on Monday but it includes the main information we want to share with regional groups.

[REDACTED]

[REDACTED]

Guidelines for project grouping

- > **2nd PCI List** should be the base for grouping in TNDP 2017
 - * In case of **competing projects** under the same PCI cluster, each competing project should be grouped separately with the main/enabled project (e.g. 2nd List PCI 8.1)
- > Grouping should always respect a «**functionality criteria**»
 - * Interconnectors (+ internal enablers)
 - = Market integration: connection of two or more Countries *
 - = Source diversification: connection to an existing or new source
 - * UGS: storage projects (and connecting pipe)
 - * LNG: regasification terminal (and connecting pipe)
 - * Reverse flow + relevant projects (eg. CS or internal reinforcement when not provided together with the reverse flow project)
 - * Supply route: supply chain to bring gas to one or more EU Countries from an existing/new source (e.g. SCFP>TANAP>TAP>Countries)

* In TNDP in the case of an interconnector impacting on the same IP between two Countries we have two distinct investment items submitted by two projects. According to ENTSOE PDMS as in case of cross-border projects requiring interconnector reinforcement as existing projects providers are recommended to submit the reinforcement for each end as a single TNDP investment item.

Based also on the last point of the proposed guidelines, for the problem "potential for new sources for diversification" I suggest you again to change the derived need in "Pipeline infrastructure allowing Europe to have access to new sources from the Caspian Basin and the Eastern Mediterranean Basin [For SGC]".

There are some projects that need to be grouped and assessed together in the TAP chain and we cannot stop at the entry point. The definition of the SGC corridor, nothing new.

Have a nice day.

Subject: TYNDP 2017 analysis of infrastructure gaps - input to the PCI process

Dear all,

ENTSOG System Development team has dedicated its efforts to best support the PCI process while TYNDP17 is still under development.

As part of actively supporting the identification of infrastructure needs by Regional Groups, ENTSOG has committed to provide the TYNDP17 assessment of the infrastructure gap to Regional Groups already from mid-October, well ahead of the TYNDP publication.

As a first step in this, we held a Webinar yesterday dedicated to presenting these results to project promoters. We had a very good participation, with more than 45 participants.

The conclusions on the identified gaps are summarised at the end of the enclosed presentation:

- The conclusions are well aligned with the input provided by the NRAs to ACER.
- The first promoters' feedback shows a good consensus on the identified gaps.

I enclose for your information the full presentation we made in the Webinar.

The analysis at regional level will be presented in each of the upcoming Regional Group meetings.

Best Regards,

[REDACTED]

Dear [REDACTED]

Thanks for your email and apologies for not getting back to you earlier.

As you know we are currently working to complete TYNDP 2017, contributing to the PCI process, working on the interlinked model and on the joint ENTSGs scenario development process for TYNDP 2018. Our resource situation is extremely tense, especially as some of the tasks (early start of the PCI process, early start of the TYNDP18 scenario development process) were not in our plans.

In these conditions, we will actually not be able to dedicate proper time to the CBA study before mid-November. We can already consider timeslots after mid-November.

In view of the tasks we need to complete by end December, we may also need to consider shifting our work on the CBA update by 1-2 months.

On the timeline you proposed, some general comments:

- ACER requested in their Opinion on TYNDP15 that we publish draft TYNDP much earlier than our current timeline (to allow for public consultation and ACER opinion before final TYNDP by end of the year). It is a recommendation we would like to consider for TYNDP18, which could mean a publication in Q3-18, earlier than what you have in your current timeline
- Based on this, it seems there is some uncertainty if the updated CBA methodology could be ready on time to be applied to TYNDP18. On our side, it means we need to think how to handle this uncertainty.

Best Regards,

[REDACTED]

Subject: CBA study / ENTSG update process [REDACTED]

Dear [REDACTED]

Thanks for your mail.

1. For clarification: what do you mean by "engage in an update process"? The study result will be our input. On top, we will see what we can come up with ourselves. Between EC/ENTSG, we should be in close contact to make sure that improvements are effective and to the most extent incorporable.
2. Let's fix meetings now, so the consultants can start working. I definitely want them to deliver something to your consultation process. I know that your time is scarce, but could we please have at least a telco (2h-3h) in the Week 43 to kick-start it. A second physical meeting between 16 and 17 November (in the afternoon 13.30-17.00) and a physical meeting (if needed, optional) between 23 and 25 November after 10.00am? Please confirm what is possible on your side, thanks. This should get them up and running.
3. On the timeline, I did some thought on this, how does the following sound, which is completely indicative and not at all coordinated inside of ENER. Please change what is nonsense:

11/2019 – adapt 4th PCI list
03/2019 – select PCIs for 4th list
11/2018 – ENTSG publishes TYNDP gas
09/2018 – ENTSG runs modelling with new CBA, incorporates in draft TYNDP. publishes
09/2018 – EC approves improved CBA
07/2018 – ENTSG submits new CBA for approval
05/2018 – either we approve (process finished) or we do not approve and request changes (process continues, ENTSG has 2 month to improve)
03/2018 – ENTSG submits adapted CBA for approval to EC
12/2017 – We submit the opinions to ENTSG, ENTSG works 3 month on updating
09/2017 – ACER opinion arrives, EC opinion, we have 3 month
06/2017 - ENTSG submits for ACER opinion (ACER has 3 month)
03/2017 – ENTSG consultation ends, we should have first study results ready, ENTSG starts working on incorporating input for 3 month

PS: What is the mail of [REDACTED] (I believe his name was?), that I can include him.

Kind regards,

[REDACTED]

Hi [REDACTED]

To be honest, we definitely do not have a clear view on the CBA update topic on our side. Only thing I can say is before mid-November we will have almost no time to dedicate to the consultant, delivery of TYNDP17 being our n°1 priority. Sorry.
On further timeline, we would need to think more and re-discuss with you.
One of the things we need to sort is, looking at the process, would EC be ready to engage in an update process in 2017?

Regards,

[REDACTED]

Ok thanks.

Could you confirm that you are fine with setting a steering committee for this study in which ENTSG and EC would sit?

When will you be able to inform us on who is retained?

On timeline: ENTSG public consultation start January 2017. Sooner would not be manageable due to finalisation of TYNDP2017.

Which means:

- Q3 2016: ENTSG early interaction with EC, ACER and possibly specific stakeholders on what should be updated
- Early Q1 2017: public consultation
- End Q1 2017: submission of updated CBA meth to ACER
- End Q2 2017: submission of updated CBA meth to ACER
- Q4: ENTSG adaptation of updated CBA meth and submission to EC
- EC approval

5 offers!

Opening 6.7., evaluation 12.7., start soon afterwards.

ACER told me that the timetable sent out in a mail with your update has flexibility of about 2 month (so everything can happen 2 months later). would you prescribe to that?

Dear [REDACTED]

We have read the tender with great interest.
We would like to suggest that ENTSOG and ACER participate in the study's Steering Committee.

Indeed, we would see it as beneficial that we can closely cooperate on the topic, especially as ENTSOG will issue its own proposals regarding improvements during the course of the study.
