The glyphosate-case was mentioned. The responsibilities within the EU decision making process and the reluctant positioning of MS as well as the linkage between policy and science were discussed. CAB emphasized the role of MS in decision-making and hence the need for industry to talk to them. It was recalled that within the Commission, DG SANTE has the political responsibility for PPP; the SANTE Cabinet should be approached. Also, farmer organisations should be lobbied and asked to become more vocal.
