Dear Sir/madam

Thank you for providing comments during the public consultation on the proposal for harmonised classification of Glyphosate.

ECHA has been informed that the Glyphosate Taskforce have opened a reading room in Brussels so that the public can read the detail of 71 toxicological studies. The reading room is open on working days until 31 October, 2016. To get access, you need to register and accept the GTF's terms and conditions <http://www.gtfstudies.org/registration>.

Summaries of the particular studies that were relevant for the proposed harmonised classification and labelling (CLH) of glyphosate are already available on ECHA's website. These are included in the CLH report and in greater scope and detail in the pesticide renewal assessment report (RAR) on glyphosate (and its addenda). The RAR was prepared as part of the assessment of the safety of glyphosate in the application for renewal of its approval as an active substance in the EFSA process. These documents were recently subject to public consultation, which along with the comments received during the public consultation, are online: <https://echa.europa.eu/harmonised-classification-and-labelling-previous-consultations/-/substance-rev/13838/term>

The members of ECHA's committee for risk assessment (RAC) have access to the original study reports to assist them as they develop their opinion on glyphosate.

Best regards,

ECHA Classification
