Dear Mr [REDACTED]

You will find my responses to your questions below.

Please note that the procedure of accordance check is briefly described in the document on ECHA website (http://echa.europa.eu/documents/10162/13641/wp_rac_accordance_check_clh_dossier_2010526_en.pdf)

Kind regards,

Fabrice

Subject: RE: [REDACTED] contact - DINP dossier

Dear Mister Broeckaert, many thanks for your follow up.

It is my understanding that the DINP dossier has now been submitted with all the correct files and that ECHA is going through the accordance check that could take up to 8 weeks (which means job would be completed early August if it is starting now).

Could you please confirm that the Public Consultation will start as of September and not before? **The accordance check duration of 8 weeks is indicative and is often extended (e.g. in case the dossier is huge/complex etc.). If the dossier is not in accordance with CLP Requirements, it is impossible for us to estimate the date for the Public Consultation since the CLH dossier will be sent back to the dossier submitter for revisions and resubmission without legal deadlines. However, please note that if the CLH dossier is in accordance with the CLP requirements, the legal deadline of 18-month for RAC to issue an opinion will start at the date of the first submission. In that case, we have to process the CLH dossier without delay. In my view, it is unlikely that the Public Consultation will be launched during the summer. We can keep you informed as soon as a date for the public consultation is fixed (i.e. 2-3 weeks before the launch of the public consultation).**

Is it possible to have access to the dossier before the Public Consultation starts? **There is no possibility for you to get access to the dossier before the Public Consultation.**

Do we already know the RAC rapporteur? **Yes the Rapporteurs are known but their names are not disclosed before RAC discussion/adoption.**

Thanks a lot for your help

Regards

Dr [REDACTED]

Dear Mr [REDACTED]

The DINP dossier has been submitted (through REACH-IT) on Friday last week but it will need to be re-submitted to allow us to process it.

We assume that the formal submission is a matter of hours/days now.

Kind regards,
Fabrice

Subject: RE: [REDACTED] contact - DINP dossier

Dear Mister Broeckaert, many thanks for your rapid follow up.

I have been in contact with Danish EPA last week and [REDACTED] (from Danish EPA) with a copy to [REDACTED] (the DS) sent me the following note "...I can inform you that the classification proposal for DINP is now finished and have just been submitted". Therefore I was assuming ECHA had received the dossier but I am not familiar with the system.

Is this submitted via Reach IT system or via a special section on the ECHA web site? Is it possible that the dossier is not yet visible by your department but will become available in a few days?

Thanks for your clarification.

Regards

Subject: [REDACTED] contact - DINP dossier

Dear Mr [REDACTED]

The CLH dossier has not been submitted to ECHA (in contrast to the expected date of submission of 01/03/2015 in the Registry of Intention). According to a recent communication from the Dossier Submitter (DS), it will be submitted in June. If you wish to receive more precision, please contact the DS at the e-mail address provided in the Registry of Intention (available [here](#) for DINP).

After submission, the CLH dossier will be subject to an "accordance check" which ensures that the dossier meets the requirements for a harmonised classification and labelling proposal referred to in Art. 37 of the CLP Regulation and as specified in parts 1 and 2 of Annex VI. The "accordance check" usually takes a couple of weeks. If the CLH dossier is in accordance, the public consultation will be launched in September or October. If the CLH dossier is not in accordance, a revision of the CLH dossier will be requested to the DS. In that case, the launch date of the public consultation is unknown.

Kind regards,

Fabrice Broeckaert
