Representative(s) of stakeholder(s)	<p> (ACEA), (FEBIAC), (FEBIAC), (Daimler), (Daimler), (Daimler), (Daimler), (Daimler), (Iveco), (Volkswagen), (Renault), (Ford) and (Toyota). </p>
DG GROW representatives	,
Representatives of other DGs	(CLIMA)

Summary of meeting

The meeting was made on invitation by ACEA in order to understand the issues related to multistage vehicles for both the RDE and WLTP parts of our emission legislations. A tour was made where some typical examples were shown and there was a further discussion afterwards.

ACEA is concerned that RDE requirements will mean that they are held responsible for the emissions performance of multistage vehicles, while they have no real control on what the second-stage manufacturer does to the base vehicle. We agreed that the issue will be further discussed during the upcoming meetings of the RDE-LDV working group with the aim to find an acceptable and equitable solution.
