Subject: FW: CCS - NZEC - COACH

Dear Mr [REDACTED],

Thank you for your interest in the EU China CCS cooperation. As mentioned, it is a complex (and long-term) issue.

[REDACTED]

On EU-China cooperation on CCS more generally, including NZEC, despite delays it is still on-going, mainly with the Chinese Ministry of Science and Technology (MOST). Pre-feasibility studies on three possible CCS-sites in China have been concluded last year. We hope to move to feasibility stage on one site in 2017 (site not selected yet). We have presented our respective proposals to EU member-states this Monday in the Partnership Instrument Committee. I am sorry that I can't disclose details yet. For your information, [REDACTED] from the French Permanent Representation to the EU is the French representative in this Committee.

A good recent up-date on the subject is the China CCS Roadmap, compiled with support by the ADB,
<http://www.adb.org/sites/default/files/publication/175347/roadmap-ccs-prc.pdf>

Britain and Norway are generally interested in the subject of China CCS. On Britain's approach, you might be aware of <https://www.gov.uk/government/world-location-news/uk-supports-china-and-indonesia-to-develop-carbon-capture-and-storage> which to my knowledge is still relevant.

Best regards,

[REDACTED]
