Subject: RE: EU-China cooperation on climate change

Dear Mr [REDACTED],

[REDACTED]

On EU-China cooperation on CCS more generally, despite some delays it is still on-going, mainly with the Chinese Ministry of Science and Technology (MOST). Pre-feasibility studies on three possible CCS-sites in China have been concluded last year. We are hoping to move to feasibility stage soon on one site (not finally selected yet).

A good recent up-date on the sector is the China CCS Roadmap, compiled with support by the ADB, <http://www.adb.org/sites/default/files/publication/175347/roadmap-ccs-prc.pdf>

Britain and Norway are generally interested in the subject of China CCS. On Britain, you might be aware of <https://www.gov.uk/government/world-location-news/uk-supports-china-and-indonesia-to-develop-carbon-capture-and-storage> which to my knowledge is still relevant. You would have to contact the British government for details. On Brexit, you will understand that I cannot comment.

Best regards,

[REDACTED]
