Subject: CCS cooperation

Dear [REDACTED],

Please let me introduce you to my colleague [REDACTED], in CC, who is responsible in the European Commission Foreign Policy Instrument for a possible financing for NZEC IIB, and was present in the discussion with MOST in Beijing on 30 March.

While awaiting the Chinese response on the below (maybe you could also ask [REDACTED], as Norway has been financing NZEC IIA, and the file has to proceed), we are discussing here in Brussels the hiring of an independent technical CCS expert who could assist us with checking the proposed Chinese work-plan for NZEC IIB (incl. visit of the two short-listed sites and informal proposal for one or two of them for IIB). Please share CV's with us if experts' names come to your mind. In case of your interest, we could cooperate on the TOR for this expert, and in general on this short-term mission (we envisage 15 man-days asap in May-June).

Finally, would you have a possibility to come to Brussels in the next weeks, in order to discuss possible co-financing for NZEC IIB? We could also try a mission to Oslo, also for my part I have almost used up my mission budget for this year in the previous months.

Kind regards,

[REDACTED]

Emne: RE: CCS cooperation

Dear [REDACTED],

Thank you again for having sent this information of April 16 2015. After a first lecture of your report, may we ask the following questions of clarification:

- Are the estimated total costs of EUR 23,7 million for NZEC IIB for one or two of your proposed projects? (In case it refers to only one site, costs would probably not be identical for both sites. Or are costs not site-dependent?)
- Could you please send us information on all the three sites that were studied in phase NZEC IIA (similar to the three site reports that you had annexed to your email to me on 14.7.2014)?

Thank you for your eventual effort in providing this information, which will allow us to swiftly proceed in decision-making.

Best regards,

[REDACTED]

Dear [REDACTED]

It was good to meet you and your hierarchy and colleagues in Beijing last week!

As discussed, we will have to make a financing decision on a possible NZEC IIB cooperation quite soon. Therefore, it would be good to get a written information on the preferred Chinese site(s) for a joint CCS feasibility-/FEED-study as soon as possible, ideally until next week.

This information could come as a NZEC IIA final report - I put my Norwegian colleague in copy for possible comment - or in any other form of your choice.

Please do not hesitate to contact me in case you need further information.

Best regards,

[REDACTED]
