- **Chemicals:** GROW informed on state of play and next steps of two major REFIT initiatives (i.e. the fitness check on chemicals legislation and the REACH REFIT). BEUC expressed concerns about exposure to hazardous chemicals in consumer products, in particular imported products (it referred to REACH authorisation requirements). GROW reminded that REACH restrictions, general product safety requirements and product-specific requirements do apply to imported products. BEUC encouraged the Commission to take further action to reduce exposure to endocrine disruptors in toys, cosmetics and other consumer products. GROW underlined the importance of a coherent approach to endocrine disruptors.
