15.1	Report on implementation of the MoU regarding Harmonisation of a Charging Capability for Mobile Phones	<b>Oral update</b>

67. [REDACTED], on behalf of the MoU signatories, presented an update of the report on the implementation of the MoU regarding a Harmonisation of Charging Capability for Mobile Phones:

- A document is expected for end of November.
- There is now a new harmonised version 1.3.1 in the latest R&TTE and EMC list of harmonised standards.
- About 95% of data enabled mobile phones going into the EU market would support the “common charger” solution.
- A review of the MoU has started in September into Digital Europe. The conclusion of the MoU is that it has been very effective and has reached the objectives. One operator in UK announced that they will sell mobile phone without a charger. In UK 70 % of the subscribers have already a charger which is compliant with the USB common charger. It would be interesting to see how that will work and to see if other operators would follow this model.
- The MoU will terminate in 2012. A discussion began between industry and the Commission, as the mobile phone market is quite dynamic but smartphones are getting more powerful. The expectation is that a kind of arrangement will be reached by the end of the year.

68. TCAM chairman thanked Mr [REDACTED] for this oral report and asked to have the written report for distribution in this group.

69. [REDACTED]: was interested to this matter and is very keen to receive the report when it will be available.

70. [REDACTED]: Thanked for the report. [REDACTED] supports interoperability. They wanted to know if other equipment will be considered.

71. The Chairman reminded that this had been an initiative of industry endorsed by the Commission. The MoU is closely followed. EC services are in conversation with the MoU signatories in order to agree on a way for its continuation. The EC is planning to launch study to carry out an evaluation on results of the MoU and it will include also other small portable equipment.
