Meeting between Vice-President Katainen and RELX Group – 10.07.2018

Transparency register: 338398611148-62

Summary:

The meeting focused on Artificial Intelligence and on its possible uses especially in the health care sector: use of deep learning techniques for diagnosis, use of algorithms to support doctors' work and decision.

There are good stories and good examples from the EU which should be better known, such as the research initiative of rare diseases
