Notes for the meeting with Aviva – 16.11.2017

Sustainable Finance – should also be applied for insurance companies: in favour around Pillar 1 and Pillar 2/3 building on stress tests for around 4 degrees;

It is also important for people, society. Introduce to World Benchmarking Alliance - citizens can screen their investment according to its greenness- or sustainability score. All sectors are ranked to match the SDGs. This is an example of Fintech in green finance. This is a tool to build trust in financial services.

Fiduciary duty – end investor has no ethics or interest or values- it should be changed.
