VI. Evaluation and incorporation of environmental risks

Environmental risks:	A screening procedure to identify environmental and social risks including human rights is used for all applications. The OECD Recommendation on Common Approaches in its current version is applied.
a) Number/exposure of transactions Category A	4 Category A projects
b) Number/exposure of transactions Category B	7 Category B projects
How are environmental risks, which can carry other relevant risks, taken into account in the officially supported export credit activities?	A prerequisite for the granting of cover is that the export transaction is eligible for support and involves a risk that is acceptable. In this context the environmental impact especially of major, sensitive projects plays an important role. We always assess the creditworthiness of the foreign buyer and if necessary the guarantor, the market situation and the country risk.
