DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

amending Directives 2003/71/EC and 2009/138/EC in respect of the powers of the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 50, 53, 62, and 114 thereof,

Having regard to the proposal from the Commission¹,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee²,

Having regard to the opinion of the European Central Bank³,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) On 23 September 2009, the Commission adopted proposals for three Regulations establishing the European System of Financial Supervisors including the creation of the three European Supervisory Authorities (ESA).

¹ OJ C [...], [...], p. [...].

² OJ C [...], [...], p. [...].

³ OJ C [...], [...], p. [...].

- (2) In order for the European System of Financial Supervisors (ESFS) to work effectively, changes to Union legislation in the field of operation of the three Authorities are necessary. Such changes concern the definition of the scope of certain powers of the ESAs, the integration of certain powers in existing processes established in relevant Union legislation and amendments to ensure a smooth and effective functioning of the ESA in the context of the ESFS.
- (3) The establishment of three ESAs should be accompanied by the development of a single rule book to ensure consistent harmonisation and uniform application and thus contribute to a more effective functioning of the internal market. The regulations establishing the ESFS provide that the ESAs may develop draft technical standards in the areas specifically set out in the relevant legislation, to be submitted to the Commission for adoption in accordance with Articles 290 and 291 of the Treaty on the Functioning of the European Union (TFEU) by means of delegated or implementing acts. Whereas Directive [2010/78/EU](#) has identified a first set of such areas, this Directive should identify a further set of areas, in particular for Directive 2003/71/EC and Directive 2009/138/EC, without prejudice to adding further areas in the future.
- (4) The relevant legislation should define those areas where the ESAs are empowered to develop draft technical standards and how such standards should be adopted. The relevant legislation should lay down the elements, conditions and specifications as detailed in Article 290 TFEU in the case of delegated acts.
- (5) The identification of areas for technical standards should strike an appropriate balance between building a single set of harmonised rules and avoiding unduly complicated regulation and enforcement. The only areas selected should be those in which consistent technical rules will contribute significantly and effectively to the achievement of the objectives of the relevant legislation, while ensuring that policy decisions are taken by the European Parliament, the Council and the Commission in accordance with their usual procedures.

- (6) Matters subject to technical standards should be genuinely technical, where their development requires the expertise of supervisory experts. The technical standards adopted as delegated acts should further develop, specify and determine the conditions for consistent harmonisation of the rules included in basic instruments adopted by the European Parliament and the Council, supplementing or amending certain non-essential elements of the legislative act. On the other hand, technical standards adopted as implementing acts should set conditions for the uniform application of legally binding Union acts. Technical standards should not involve policy choices.
- (7) In the case of regulatory technical standards it is appropriate to introduce the procedure provided for in Articles 10 to 14 of Regulation (EU) No 1093/2010 [EBA], of Regulation (EU) No 1095/2010 [ESMA], and of Regulation (EU) No 1094/2010 [EIOPA]. Implementing technical standards should be adopted in accordance with the procedure provided for in Article 15 of Regulation (EU) No 1093/2010 [EBA], of Regulation (EU) No 1095/2010 [ESMA], and of Regulation (EU) No 1094/2010 [EIOPA]. The European Council endorsed the four-level 'Lamfalussy' approach to make the regulatory process for Union financial legislation more efficient and transparent. The Commission is empowered to adopt level-2 measures in many areas, and a large number of level-2 Commission regulations and directives are in force. In cases where the technical standards are designed to further develop, specify or determine the conditions of application of such level-2 measures, they should be adopted only once the relevant level-2 measures has been adopted and should respect the content of that level-2 measure.

- (8) Binding technical standards contribute to a single rulebook for financial services legislation as endorsed by the European Council in its conclusions of June 2009. To the extent that certain requirements in Union legislative acts are not fully harmonised, and in accordance with the precautionary principle on supervision, binding technical standards developing, specifying or determining the conditions of application for those requirements should not prevent Member States from requiring additional information or imposing more stringent requirements. Technical standards should therefore allow Member States to do so in specific areas, where those legislative acts provide for such discretion.
- (9) As set out in the regulations establishing the ESFS, before submitting the technical standards to the Commission, the ESA should, where appropriate, conduct open public consultations relating to them and analyse the potential related costs and benefits.
- (10) It should be possible for technical standards to provide for transitional measures subject to adequate deadlines, if the costs of immediate implementation would be excessive compared to the benefits involved.
- (11) The Regulations establishing the ESFS provide for a mechanism to settle disagreements between competent national authorities. Where a competent authority disagrees with the procedure or content of an action or inaction by another competent authority in areas specified in legal acts of the Union in accordance with Regulation (EU) No 1093/2010 [EBA], Regulation (EU) No 1095/2010 [ESMA] and Regulation (EU) No 1094/2010 [EIOPA], where the relevant legislation requires cooperation, coordination or joint decision-making by competent national authorities from more than one Member State, the ESA, at the request of one of the competent authorities concerned, should be able to assist the authorities in reaching an agreement within the time limit set by the ESA which should take into account any relevant time limits in the relevant legislation, and the urgency and complexity of the disagreement. In the event that such disagreement persists, the ESA should be able to settle the matter.

- (12) The regulations establishing the ESAs require that the cases where the mechanism to settle disagreements between competent national authorities may be applied are to be specified in the sectoral legislation. This Directive should identify a first set of such cases and should be without prejudice to adding further cases in the future. This Directive should not prevent the ESAs from acting in accordance with other powers or fulfilling tasks specified in their establishing regulations, including non-binding mediation and contributing to the consistent, efficient and effective application of legal acts of the Union. Moreover, in those areas where some form of non-binding mediation is already established in the relevant legal act, or where there are time limits for joint decisions to be taken by one or more competent national authorities, amendments are needed to ensure clarity and minimum disruption of the process for reaching a joint decision, but also that where necessary, the ESAs should be able to resolve disagreements. The binding procedure for the settlement of disagreements is designed to solve situations where competent supervisors cannot resolve, among themselves, procedural or substantive issues relating to compliance with legal acts of the Union.
- (13) This Directive should therefore identify situations where a procedural or a substantive issue of compliance with Union law may need to be resolved and the supervisors may not be able to resolve the matter on their own. In such a situation, one of the supervisors involved should be able to raise the issue with the competent ESA. That ESA should act in accordance with the procedure set out in its establishing regulation and in this Directive. It should be able to require the competent authorities concerned to take specific action or to refrain from action in order to settle the matter and to ensure compliance with Union law, with binding effects on the competent authorities concerned. In cases where the relevant legal act of the Union confers discretion on Member States, decisions taken by a ESA should not replace the exercise of discretion by the competent authorities in compliance with Union law.

- (14) Directive 2009/138/EC of the European Parliament and of the Council of 25 November 2009 on the taking up and pursuit of the business of insurance and reinsurance (Solvency II)⁴ provides for joint decisions as regards the approval of applications to use an internal model at group and subsidiary levels, the approval of applications to make a subsidiary subject to Article 238 [...] of that Directive and the identification of the group supervisor on a different basis from the criteria set out in Article 247 of that Directive. In all of these areas, an amendment should clearly state that in the event of disagreement, the European Insurance and Occupational Pensions Authority (EIOPA) may resolve the disagreement using the process outlined in Regulation (EU) No 1094/2010. This approach would make it clear that disagreements can be resolved and cooperation strengthened before a decision is made or issued to an institution. EIOPA's role in resolving disagreements is to mediate between the conflicting views of the supervisory authorities rather than to substitute judgements in the matters concerned. The fact that EIOPA has acted to mediate a specific disagreement should not be understood as meaning that EIOPA should have an ongoing role in the supervision of the subject matter of the application.
- (15) The new supervisory architecture established by the ESFS will require national supervisory authorities to cooperate closely with the ESAs. Amendments to the relevant legislation should ensure there are no legal obstacles to the information sharing obligations included in the regulations proposed by the Commission establishing the ESAs.
- (16) In areas where the Commission is currently empowered by Directive 2009/138/EC to adopt implementing measures where these measures are non-legislative acts of general application to supplement or amend certain non-essential elements of that Directive in the sense of Article 290 TFEU, the Commission should be empowered to adopt delegated acts in accordance with that Article.

⁴ OJ L 335, 17.12.2009 p. 1-155

- (16a) In order to ensure that the same treatment is applied to all insurance and reinsurance undertakings calculating the Solvency Capital Requirements on the basis of the standard formula, or to take account of market developments, the Commission should be empowered to adopt delegated acts in relation to Solvency Capital Requirement on the basis of the standard formula.⁵
- (16b) In order to address risks which are not adequately covered by a sub-module, the Commission should be empowered to adopt delegated acts in relation to quantitative limits and asset eligibility criteria for the Solvency Capital Requirement on the basis of the standard formula.⁶ Those delegated acts should apply to assets covering technical provisions, excluding assets held in respect of life insurance contracts where the investment risk is borne by the policy holders.
- (16c) In order to ensure a harmonised approach to the use of internal models throughout the Community and to enhance the better assessment of the risk profile and management of the business of insurance and reinsurance undertakings, the Commission should be empowered to adopt delegated acts in relation to the use of internal models.⁷
- (16d) The Commission should ensure that the new prudential regime avoids undesirable impacts in its treatment of insurance business with long term guarantees. While adopting delegated acts, the Commission should also ensure that the continuity and further development of insurance activities with long term guarantees is not impaired.**

⁵ recital taking over initial part of Art 111(1) from 2009/138

⁶ recital taking over initial part of Art 111(2) from 2009/138

⁷ recital taking over initial part of Art 127 from 2009/138

- (17) In order to allow for the consistent calculation of technical provisions by insurance and reinsurance undertakings under Directive 2009/138/EC, it is necessary for a central body to derive, publish, and update certain technical information related to the risk-free interest rate term structure, which takes account of observations in the financial market, and for the body to be able to do this on a regular basis. Given the technical and insurance related nature of these tasks, they should be carried out by EIOPA.
- (18) In order to ensure that certain technical inputs to the Solvency Capital Requirement (SCR) using the standard formula are provided on a harmonised basis, for instance to allow for harmonised approaches toward the use of ratings, specific tasks should be assigned to EIOPA. The detailed manner for the exercise of such tasks should be further specified in measures to be adopted by delegated act.
- (19) In order to ensure a harmonised approach under Directive 2009/138/EC in [...] declaring where an extension to the recovery period in cases of breaches of the SCR is permitted, the conditions which constitute "an exceptional fall in the financial markets" that may exist in one or more Member States should be specified. EIOPA, upon request from the supervisory authority concerned, should be responsible for [...] declaring whether those conditions have been fulfilled and the Commission should be empowered to adopt measures by means of delegated acts specifying the relevant procedures to be followed.
- (20) In order to ensure cross-sectoral consistency and to remove the misalignment between the interests of firms that "repackage" loans into tradable securities and other financial instruments (originators) and the interests of insurance or reinsurance undertakings that invest in such securities or instruments, the Commission should be empowered to adopt measures by means of delegated act in the context of investments in repackaged loans under Directive 2009/138/EC, specifying not only the requirements but also the consequences of breaching those requirements.

- (21) In order to allow for greater convergence on procedures for supervisory approvals provided for in Directive 2009/138/EC of undertaking specific parameters, model change policies, special purpose vehicles and the setting and removal of capital add-ons, the Commission should be empowered to adopt measures by means of delegated act specifying procedure in these areas.
- (22) The development of international convergence toward risk-based solvency regimes should be encouraged. In order to acknowledge that some third countries may need more time to adapt and implement a solvency regime that would fully satisfy the criteria for being recognised as equivalent, it is necessary to enable Commission measures adopted by means of delegated act to specify transitional arrangements in relation to the treatment of such third country regimes, particularly where a public commitment to converge to a regime equivalent to Directive 2009/138/EC has been made.
- (23) In order to enable the European Cooperative Society, established in Council Regulation (EC) No 1435/2003 of 22 July 2003 on the Statute for a European Cooperative Society (SCE)⁸, to provide insurance and reinsurance services, it is necessary to extend the list of permissible legal forms of insurance and reinsurance undertakings under Directive 2009/138/EC to include the European Cooperative Society (SCE).
- (24) The amounts in euro of the Minimum Capital Requirement floor for captive reinsurance undertakings should be adapted. Such an adaptation arises out of the periodic adjustment of the existing capital requirement floors for such undertakings to take account of inflation.⁹

⁸ OJ L 207, 18.8.2003, p. 1.

⁹ OJ C 63, 18.03.2009, p. 11.

- (25) In order to better reflect the date which marks the end of the financial year for the majority of insurance undertakings (31 December) and to enable a smoother transition between the old and new regimes, the relevant transposition, repeal and application dates in Directive 2009/138/EC should be extended[...].
- (26) Certain implementing powers designed under Article 202 of the Treaty establishing the European Community (EC Treaty) should be replaced with the appropriate provisions in accordance with Article 290 TFEU.
- (27) The alignment of comitology procedures to the TFEU and, in particular, to Article 290 thereof, should be effected on a case-by-case basis. In order to take account of the technical developments in the financial markets and to specify the requirements laid down in the directives amended by this Directive, the Commission should be empowered to adopt delegated acts in accordance with Article 290 TFEU. In particular, the delegated acts should be adopted in respect of details concerning governance requirements, valuation, supervisory reporting and public disclosure, the determination and classification of own funds, the standard formula for the calculation of the Solvency Capital Requirement (including any consequential changes in the area of capital add-ons) and the choice of methods and assumptions for the calculation of technical provisions.
- (27a) In the Declaration (No 39) on Article 290 TFEU, annexed to the Final Act of the Intergovernmental Conference which adopted the Treaty of Lisbon, the Conference took note of the Commission's intention to continue to consult experts appointed by the Member States in the preparation of draft delegated acts in the financial services area, in accordance with its established practice.¹⁰

¹⁰ Corresponds to recital 25 of Omnibus 1

- (28) The European Parliament and the Council should have [...] three months from the date of notification to object to a delegated act. At the initiative of the European Parliament or the Council, it should be possible to prolong that period by [...] three months with regard to significant areas of concern. It should also be possible for the European Parliament and the Council to inform the other institutions of their intention not to raise objections. Such early approval of delegated acts is particularly appropriate when deadlines need to be met, for example where there are timetables in the basic act for the Commission to adopt delegated acts.
- (29) In order to allow for a smooth transition under Directive 2009/138/EC to a new regime, it is necessary to provide for transitional requirements relating to insurance and reinsurance undertakings which have closed their activity, [...] the [...] classification of own funds, the standard formula for the calculation of the Solvency Capital Requirement, [...] the choice of methods and assumptions for the calculation of technical provisions, and occupational retirement provision by insurance undertakings. The transitional requirements relating to the classification of own funds should relate to basic own-fund items, including subordinated mutual member accounts, preference shares and subordinated liabilities, which have been issued in compliance with the laws, regulations and administrative provisions adopted pursuant to Directive 2002/83/EC, Directive 73/239/EEC and Directive 2005/68/EC.

- (29a) Where such changes are made at the level of the individual undertaking, corresponding and consequential changes should be made to the calculation of group solvency [...]. Article 218(2) and (3) provide the basis for solvency requirements for supervision in cases of application of group supervision mentioned in Article 213. The methods and principles for calculating group solvency referred to in Article 218 are set out in more detail in Articles 220 to 235. Those methods and calculations apply (whether directly or by analogy) to cases of application of group supervision mentioned in Article 218. To the extent that such group solvency rules make reference to solvency rules at the level of the individual undertaking and where a transitional solvency regime is applied at individual level corresponding adaptations may need to be made to the group solvency rules.
- (30) The transitional requirements should aim at avoiding market disruption and limiting interferences with existing products as well as ensuring the availability of insurance products. The provisions of transitional requirements should also allow proper consideration to be taken of the significant and valuable industry -wide information to be obtained from the quantitative impact study (QIS5). The transitional provisions set out in Directive 2009/138/EC should further specify non-essential elements to be determined by delegated acts. While the [...] periods for the transitional provisions are to be set out in Directive 2009/138/EC, further specifications should be introduced through delegated acts and should reflect the specific characteristics of the provisions and facilitate the application of the new regime. The transitional requirements should at least be equivalent, in effect, to the existing framework on insurance and reinsurance directives and should not result in more favourable treatment for insurance and reinsurance undertakings, or lower protection for policy holders, than currently exists. The transitional requirements should encourage undertakings to move towards compliance with the particular requirements of the new regime as soon as possible.

- (30a) The period for the transitional provisions in relation to third country equivalence are to be set out in Directive 2009/138/EC, the actual time period should end on the date on which, in accordance with this Directive, the solvency regime of the third country concerned has been deemed to be equivalent to that laid down in Directive 2009/138/EC.
- (30b) In order for the solvency regime laid down in this Directive to operate effectively, supervisory authorities should have the necessary powers to require insurance and reinsurance undertakings to provide them at an early stage with an implementation plan which will enable them to monitor the progress achieved by undertakings in view of the consistent and timely application of this Directive [...]. To achieve this aim EIOPA should develop guidelines concerning the content of the implementation plan. Supervisory authorities may require insurance and reinsurance undertakings to provide any information on the actions outlined in the implementation plan.
- (30c) The guidelines to be issued by EIOPA as regards the requirements related to the implementation plan should provide the necessary flexibility for supervisory authorities to take into account the actual level of preparedness a particular insurance or reinsurance undertaking has achieved. These guidelines should also ensure the proper application of the proportionality principle.**

- (30d) Notwithstanding the **anticipated** application of the Solvency II provisions particularly for the purposes of the assessments related to the approval of internal models, ancillary own funds, classification of own funds, undertaking specific parameters, special purpose vehicles, **the duration based equity risk sub-module, and the transitional provision on the calculation of the best estimate with respect to insurance or reinsurance obligations corresponding to paid-in premiums for existing contracts**, the provisions of Solvency I (Directives 64/225/EEC, 73/239/EEC, 73/240/EEC, 76/580/EEC, 78/473/EEC, 84/641/EEC, 87/344/EEC, 88/357/EEC, 92/49/EEC, 98/78/EC, 2001/17/EC, 2002/83/EC and 2005/68/EC, as amended by the acts listed in Part A of Annex VI) will continue to apply during the course of 2013.
- (30e) In accordance with point 34 of the Interinstitutional Agreement on better law-making , Member States are encouraged to draw up, for themselves and in the interest of the Union, their own tables illustrating, as far as possible, the correlation between this Directive and the transposition measures, and to make them public.
- (31) Since the objectives of this Directive, namely improving the functioning of the internal market by means of ensuring a high, effective and consistent level of prudential regulation and supervision, protecting policy holders and beneficiaries and thereby businesses and consumers, protecting the integrity, efficiency and orderly functioning of financial markets, maintaining the stability of the financial system, and strengthening international supervisory coordination, cannot be sufficiently achieved by the Member States and can, therefore, by reason of scale of the action, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Directive should not go beyond what is necessary in order to achieve those objectives.

- (32) The Commission should, by 1 January 2014, and every three years thereafter, report to the European Parliament and to the Council on the submission by the ESA of the draft technical standards provided for in this Directive and present any appropriate proposals.
- (33) Directives 2003/71/EC and 2009/138/EC should therefore be amended accordingly,

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Directive 2003/71/EC is amended as follows:

ESMA shall submit those draft regulatory technical standards to the Commission by 1 January 2014.

Power is delegated to the Commission to adopt the regulatory technical standards referred to in the first subparagraph in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010."

- (4) Article 14(8) is replaced by the following:

"8. In order to ensure consistent harmonisation of this Directive, ESMA shall develop draft regulatory technical standards to specify the provisions relating to the publication of the prospectus in paragraphs 1 to 4.

ESMA shall submit those draft regulatory technical standards to the Commission by 1 January 2014.

Power is delegated to the Commission to adopt the regulatory technical standards referred to in the first subparagraph in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010."

(5) Article 15(7) is replaced by the following:

"7. In order to ensure consistent harmonisation of this Directive, ESMA shall develop draft regulatory technical standards to specify the provisions concerning the dissemination of advertisements announcing the intention to offer securities to the public or the admission to trading on a regulated market, in particular before the prospectus has been made available to the public or before the opening of the subscription, and specify the provisions laid down in paragraph 4.

ESMA shall submit those draft regulatory technical standards to the Commission by 1 January 2014.

Power is delegated to the Commission to adopt the regulatory technical standards referred to in the first subparagraph in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010."
