Dear [REDACTED],

As you have probably heard, the French government have gone forward with a suspension of E 171 from 1 January 2020. The legal act was published yesterday.

To keep you up to date, TDMA have made a number of efforts to address the concerns raised by the French Government and sent a number of letters and responded to the ANSES call for data on nanomaterials in food. An example of the letters and our response is attached as well as a copy of a statement that we have prepared on the subject.

Can you advise whether the French Government have yet informed the European Commission?

Best regards

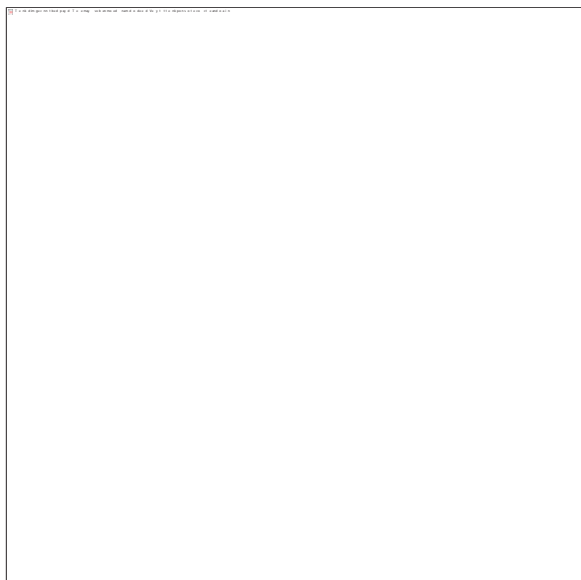

[REDACTED]
