Subject: Feedback on the meetg with TIE on titanium dioxide on 16.9.2019

Meeting participants

TIE:

- [REDACTED]
- [REDACTED]

COM:

- ENV chemicals Unit (in charge of the CLP Regulation 1272/2008);
- GROW.D.2 (in charge of the CLP Regulation 1272/2008);
- GROW.D.3 (in charge of the Toy Safety Directive 2009/48/EC).

Background

TIE is concerned about having to put warnings on toys made of plastics, paper toys, finger paints, water paint tablets, colour chalks and others with warnings due to their content of titanium dioxide (TiO₂).

TiO₂ is only classified as a Carc. Cat. 2

- If in powder form and
- If the powder contains at least 1% of particles with a diameter of less than 10 µm.

Warning statements apply to liquid or solid mixtures containing such TiO₂.

Result of the meeting

- TIE will send us a list of toys or toy materials that contain the classified TiO₂ (see above). TIE will indicate whether they consider exposure to TiO₂ possible;
- Perhaps a generic exemption from the warning statements can be agreed under the CLP Regulation 1272/2008 if there is no exposure.
Cf. metals in solid form: No labelling under the CLP Regulation 1272/2008 necessary since no exposure.
