Remarks

1. Monitoring Committee 1: 2012-TC-2012-TC-454-DAFC

The Danish Agricultural and Food Council (DAFC) reported no significant problems in the implementation of the programme.

The need for this type of promotion programme (pork in China) has been emphasized. The potential of this market becomes clear when looking at the results. The EU's market share is now 65%, surpassing the US. For this section of the market (pork cuts), the EU receives higher prices than its competitors. It is also the section of the market where generally most added value can be attained. Therefore the next campaign (submitted for the second wave of 2015), targets exclusively this segment.

The PO recognizes this success is not only due to the programme. It is hard to disentangle the programme's effect from general market trends.

Many retailers recognize the unique quality of the EU's pork meat (e.g. ractopamine free). Even the US retail chain Walmart has turned to EU pork meat for reasons of perceived food safety.

The PO emphasized the importance of the EU as a brand. The success of the campaign is not due to the Danish origin, Denmark is not as much recognized as the EU, it is due to the EU origin of the products. Therefore they requested to be able to use the "Enjoy it's from Europe logo" on material after the end of a campaign or even on campaign material not funded by the EU. They claim it would be a pity to build brand recognition for 3 years and then remove the brand's logo.

Due to the increased attention for corruption in China, it has been difficult to invite government officials to the workshops on EU pork meat. This part of the programme aims to inform custom officials and officials in charge of import licences of the specificities of EU pork meat.

2. Monitoring Committee 2: 2012-IM-517-EMF

Although the official monitoring committee takes place in France (the coordinator), an unofficial monitoring meeting was organized to inform about the state of play in Denmark.
3. **Monitoring Committee 3 – 2013-IM-527-GAU**

The implementation "Season" campaign develops as predicted.

4. **Workshop on the Future Promotion Policy**

The state of play of the on-going reform of the agricultural promotion policy was presented to the participants. The stakeholders present showed great interest and a positive attitude towards most of the elements presented.

- There was a concern raised regarding the annual work programme. Although the new regulation opens the promotion policy to new stakeholders, the DAFC worries that the annual work programme would be too restrictive and "close" to policy again. COM replied that this will certainly not be the case for TC programmes. For IM programmes there might be more competition for the budget for generic programmes (i.e. programmes not focused on quality schemes).

A reply to the following questions will be provided by COM in the following weeks:
- What is meant by brand? Some companies have several brands and could indirectly take a large part of the space provided for brands under the new Regulation.
- On which level is the Danish national logo for organics allowed to appear?
- What is meant by a crisis? Who will define this? And how a lengthy procedure will be avoided?
- Is a national crisis also considered a crisis? The interlinkages of markets would create European impacts.
- What is meant by the "other financial instruments" besides "parafiscal contributions"?
- Can there be several implementing bodies (provisional answer: yes, to be checked).
- Will the Commission/Agency be available for questions regarding the implementation?
- Are Proposing Organisations from the Faroër Islands eligible (=TC). A provisional negative answer was provided. To be checked.
- On what conditions is VAT eligible (TC)?
- There is no maximum % anymore on the implementation of the programme by the proposing organisation. How can one know whether it will be accepted?
- There is the request to be able to use the "Enjoy it's from Europe" signature on material after the end of a campaign or even on campaign material not funded by the EU.

**Conclusions**

There were no critical points raised during the monitoring committees, not by the Danish AgriFish Agency, nor by the Proposing Organisations.

All participants of the workshop on the future promotion policy showed strong interests. Several among them voiced explicit intends to propose new programmes. To the extent possible COM will come back to the questions regarding the future Regulation(s).
