(*) It is expected that every activity produces as least one deliverable and that the activity cost is included in the cost of the corresponding deliverable, i.e. the cost for the material (electronic or

paper deliverable) produced for a presentation in a course of an event, should integrate the overall cost for the content collection, material preparation and physical presentation. In the exceptional case that some activities cannot be connected to any specific deliverable or task, they could still be introduced in the pertinent column and be marked appropriately as “activity not linked to deliverable” or “activity not linked to concrete tasks”.

(**) The contractor may adapt this table, if necessary.
