---

Dear Klaus-Dieter,

It is my pleasure to send you Hydrogen Europe's Vision on the role of hydrogen and gas infrastructure on the road toward a climate neutral economy.

This paper is the result of the discussion that you had with us when addressing our Gas Grid WG and its Chair, [REDACTED]. This led us to an engaged conversation amongst research centres and industrial companies, representing the entire hydrogen value chain including industrial gas companies, electrolyser manufacturers, gas system operators, utilities and end-users.

We sincerely hope you will find this paper interesting and insightful.

We are looking forward to meeting with you next week, start a meaningful debate and would like to thank you for being given the opportunity to represent our sector and this paper's key issues at the Madrid Forum in June.

Best regards,

[REDACTED]
