Kevin,

Tiina spoke with MT Ambassador along the lines we discussed. Stressing the good cooperation in the preparation of MT law at the time and the need to check now how it is applied in practice for which we need information and data. Tiina explained that different options are under consideration without committing in one or the other direction. Next step: we will organise a meeting at technical level with MT experts to make the point on where they stand and get replies to our questions/concerns. On the basis of this information we will then come to you (within 2-3 weeks) with the note with different options (including the EU Pilot, if still needed) for your consideration.
