EPF Capacity Building
Separation between CFSP and other Union policies

Article 40 TEU prohibits CFSP to encroach on other Union policies (including development cooperation) and, vice versa, it also prevents these policies from impinging on CFSP.

Moreover, it is not legally possible to have an instrument that pursues both CFSP and development objectives, since their legal basis are incompatible and the role of the EP different.

While all Union policies must contribute to the attainment of the overall external action objectives of the Union as defined in Article 21 TEU, each policy has its own primary specific objective. In the case of the Union's development cooperation policy, it is the eradication of poverty.
The European Peace Facility

Capacity Building

The purpose of the EPF is to facilitate the financing of Union actions having military or defence implications and pursuing CFSP objectives (≠ development).

Its overall objective is to enhance the Union's ability to preserve peace, prevent conflicts and strengthen international security, in accordance with Article 21(2) (c) TEU.

EPF capacity building actions aim at strengthening the military and defence capacities of third states, regional and international organisations to preserve peace, to prevent, manage and resolve conflicts and to address threats to international security.
