European Union of Private Hospitals

Invitation

Private Hospitals in Europe: Supporting Sustainable Health Systems

7 November 2017 – 11.00h- 12.30h
Brussels, European Parliament, Room 6Q1

The **European Union of Private Hospitals**, in collaboration with the **EPP group** of the European Parliament, has the pleasure to invite you to the official launch of its Factbook *"Private Hospitals in Europe: Supporting Sustainable Health Systems"*.

UEHP has given carte blanche to [redacted] European health expert, to reflect on the place of private hospitals in an evolving Europe of 28.

Our challenge is to carry out the modernisation of the provision of healthcare services, including innovation and necessary investment while respecting the strict budgetary constraints of the health systems in each member state.

Our action is focused on the quality of relevant and timely healthcare services for all European citizens. The private sector claims its place in an environment of increased competition by bringing professionalization of management, strategies adapted to an innovative healthcare provision, which are key to the success of quality health services of tomorrow.

The event will focus on best practices and challenges and how the private sector can support the shift to sustainable and resilient healthcare systems.
