Subject: European Dairy Association (EDA) - kind request of bilateral exchange [REDACTED]
[REDACTED] on SUP

Dear [REDACTED]

I am contacting you with regard to the future implementing acts and guidance under the Directive on the reduction of the impact of certain plastic products on the environment, which are currently being developed by DG ENV with the support of a group of consultants led by Ramboll.

We would be very pleased to have the opportunity to exchange with you bilaterally on this important topic and share our dairy perspective, also considering that due to the current COVID-19 situation the remaining stakeholder workshops are postponed/cancelled for the time being.

While understanding the inherent difficulty of fixing a date for a meeting in such uncertain times, I would already propose a few possible dates for your kind consideration: 14-16-17-23-24 April or 5-7 May.

Thank you a lot for your attention.

With best regards,

[REDACTED]
