Subject: A European Hydrogen Strategy
Attachments: H2morrow Infographic_EN.pdf

As the European Commission is finalizing its proposal for a European Hydrogen Strategy we believe it important to share information about the H2morrow project we are currently pursuing with European partners.

With the right strategic impetus and levels of support these kind of projects can be realized and result in significant decarbonization of steel in Europe.

We hope this is useful and are naturally happy to provide additional information about the project if required.

Yours sincerely,

—
