CureVac’s mRNA based Vaccine Candidate against SARS-CoV-2

Data update
August 14th, 2020

- STRICTLY CONFIDENTIAL -
Key elements

1. Company highlights and mRNA platform
   - Pioneer in developing mRNA vaccines and therapies; broad IP position: mRNA optimization and protein design
   - Low doses required for vaccine efficacy enable large scale production
   - Acceleration of manufacturing capacity
   - External validation of platform:

2. Covid19 program
   - Clinical candidate selected based on manufacturability and biological properties; characterization of immunogenicity and safety done in vitro and animal models
   - Regulatory approval

3. Vaccine presentation & administration
   - Vaccination course of
CureVac’s Covid-19 Program Overview

Accelerating Efforts to Develop a SARS-CoV-2 Vaccine

Plan to make a vaccine available as soon as possible upon approval
Accelerating Efforts to Develop a SARS-CoV-2 Vaccine

Development Plan overview and timeline
Challenge study designed to analyze efficacy and risk of disease enhancement:

- 
- 
- Data on protection and disease enhancement by
Challenge study: viral loads in lungs and nasal turbinates

- 
- 
-
