Dear [redacted]

Thank you for informing us. It seems at a first view that a different angle has been given to our study compared to 'yours'. We will be interested in exchanging our views and compare the main outcomes.

The Impact Assessment study on Common Charger commissioned by the Commission and performed by IPSOS/Trinomics will be soon published on the Commission websites (both on sectoral RED pages and OP ones). I will inform you as soon as this will take place.

Best regards,

[redacted]

Subject: Publication of Copenhagen Economics Study

Dear [redacted],

I am following up on our meeting of December 5 where we referenced the - at the time - forthcoming study regarding the potential impact of regulatory intervention in relation to standard chargers for mobile phones.

I would hereby like to inform you that the study has been published and may be retrieved at <https://www.copenhageneconomics.com/publications/>.

The study, conducted by Copenhagen Economics, addresses important concerns in relation to the detrimental impact on innovation of potential future regulatory initiatives.

We would welcome the opportunity to discuss with you the Copenhagen Economics study as well as the Commission's impact assessment study in more detail following its publication.

We remain at your disposal should you have any further questions at this point of course.

Kind regards,

[REDACTED]

Dear [REDACTED],

Thank you very much for your confirmation.

Thursday 5 December at 10:30 would indeed also work for us.

The meeting will be attended by [REDACTED] and myself.

Please let me know if you need additional information (registration/security) prior to the meeting?

Kind regards,

[REDACTED]

Subject: Meeting Request - Common Charger Initiative with our Senior Standards Counsel (5 December)

Dear Ms [REDACTED]

I am reaching out in relation to the Commission's ongoing work on the Common Charger Initiative.

Our expert from our Standards Legal team will be in Brussels on the **5th of December**.

As such, I was wondering if it might be possible to organise a meeting with him to discuss the latest developments of the file?

Equally, we would be able to further elaborate on our position and clarify our concerns - also based on additional data that has been obtained over the past couple of months.

So far, our agenda on the 5th of December is fairly flexible so we would be able to accommodate any time that might suit you best.

Looking forward to your reply at your earliest convenience,

[REDACTED]
