

3. BDI-Klimakongress

3rd BDI-Climate Congress

Industry. Mobility. Circular Economy.

As a result of the corona pandemic, European industry is faced with the challenge of putting the ambitious climate protection projects of the EU Commission and the German Federal Government into practice under greatly changed conditions. How can industry successfully manage this double transformation? What opportunities arise from the crisis for an economically sustainable climate policy?

With the 3rd Climate Congress, the BDI offers an inclusive forum for exchange between representatives of politics, business, science and social groups to discuss technological game changers, political framework conditions, economic opportunities and social repercussions.
