---

Dear [REDACTED],

I can propose a Webex meeting with Lukas, Aleksandra, Jorge Antunes and colleagues from DG CLIMA and AGRI on 13 January at 09h30.

Would that be convenient from your side ?

Kind regards,

[REDACTED]

[REDACTED]  
**Subject:** Request for a meeting to introduce DSM and solutions for GHG reductions in agriculture

Dear Aleksandra and Lukas,

I hope you are doing well.

I am [REDACTED] and with [REDACTED] (in cc.), we work for #SustainablePublicAffairs: a PA agency in Brussel that advocates for the interests sustainable frontrunners like, in this case, DSM.

As recently discussed with your colleague [REDACTED] (also in cc.), we would want to reach out to you in relation to the Methane Strategy and the EU Carbon Farming Initiative.

First of all, I wanted to compliment the European Commission for addressing methane emissions in the EU via the Methane Strategy. Despite the fact that there are no concrete targets yet, this strategy is a step in the right direction! It is important that agriculture is included in the strategy, because it plays an important role in reducing this greenhouse gas.

In order to achieve a significant emission reduction within agriculture, it is important to reward the farmer and the food value chain for emission reductions (CO2 and methane), for example through the upcoming "EU Carbon Farming Initiative".

DSM and other have some concrete solutions that we would like to discuss further with you. We believe this might help to create more common ground between farmers and the EU climate targets, so we hope you would have 30 minutes for us in the beginning of 2021. Would 13, 14 or 15 January suit you? Please let us know.

Thank you very much in advance and kind regards,

[Redacted]
