Dear Commissioners Kyriakides and Breton,

Thank you again for re-installing these regular calls regarding the situation in relation to COVID-19 and possible shortages. Please continue to count on the innovative pharmaceutical industry as we continue to prioritise the supply of medicines, the support of healthcare systems as well as the research and development of treatments, diagnostics and vaccines to fight the virus.

Attached you will find the EFPIA and Vaccines Europe situational analysis to 30 September 2020 that my colleague Magdalena and I presented today. We have also included the answers to the questions sent. Should you require more detailed information specifically on the challenges related to Brexit and the Northern Ireland Protocol, please do not hesitate to let us know as time is incredibly short.

Thank you again and best wishes,
