**BNY Mellon**

**Topic: sustainable finance & the capital markets union**

**Minutes:** BNY Mellon have two main branches – investment management and asset servicing. They are working to incorporate ESG into everything that they do. They described the major challenges related to information and data. Namely conflicting information and the type of information available. There is a need to combat green washing and have better reporting and tracking methods for investor certainty. They would like a global approach to taxonomies. They presented their views on completing the Capital Markets Union.
