Subject: Meeting with BEUC re. new evidence on fluorinated substances in food packaging
Attachments: beuc-x-2017-019_smapmo_european_consumer_organisations_call_for_action_on_fluorinated_compounds_in_fast_food_packaging.pdf

Dear [REDACTED],

My name is [REDACTED] with BEUC, The European Consumer Organisation.

I write to share with you results from a test of fluorinated compounds in fast food packaging recently carried out by five BEUC members. The survey found that almost one third of 65 samples contained problematic fluorinated compounds, some of which are suspected to increase the risk of miscarriage or to impact the immune system. A short summary of the results along with a letter we send to MEP Christel Schaldemose, rapporteur on the EP FCM resolution, are attached.

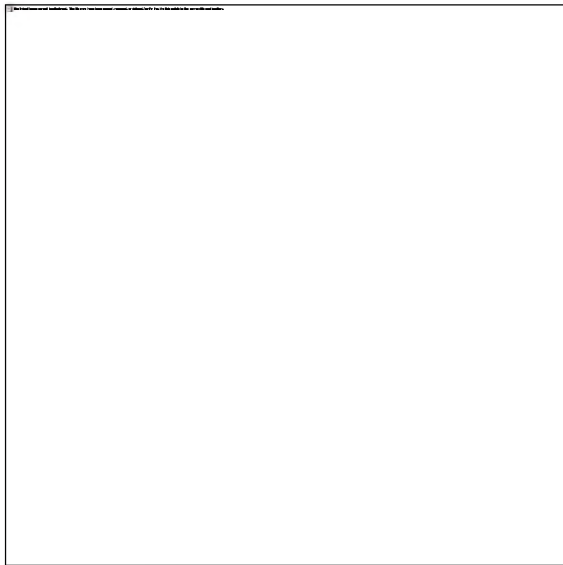

We would in this context be interested to present to you our survey in further detail and to learn more about how the European Commission views possible options to ensure the safety of paper and board food packaging. Therefore, I was hoping you might be available in near future to meet with me and my colleagues who carried out the study.

Thank you in advance. I look forward to your reply.

Kind regards,

[REDACTED]
