Subject: Updated ACEA position paper on CO2 for HDV's

Dear Mrs Evans,

Having reviewed in more detail the Commission's proposal introducing new CO2 standards for trucks, we have now updated our position paper providing industry's perspective on the different concrete proposals from the Commission which are currently under review in the European Parliament.

Please find attached our detailed analysis which we are also using in our discussions with the European Parliament and Council.

We are obviously supporting this initiative of the Commission ; on those parts of the proposal where we are misaligned, we have developed some alternative recommendations on how to deliver the objectives of the Commission's proposal taking into account facts and concrete experience provided by our members .

Best regards,

[REDACTED]
